

Benson IT Solutions, Inc. **Action Item System**

Revised and supported since 2003, this web action tracking system has many features:

- Integrates with Benson IT Solutions Web Calendar v3.3 and higher
- Can be purchased separately or with other BIT applications
- Add and edit users
- Add and edit tasks/projects
- Assign users to tasks/projects
- Users will only see action items that are related to a task they have been assigned to
- Assign actions by task/project
- Action items can have the following:
 - Lead user, assignee user, status, date assigned, date due, date completed, project/task type, subject, description, upload attachments, sub actions and comments
- Sub actions can have most of the same attributes as an action.
- Actions can be related to a previous action item
 - Allows look up of a "lessons learned reference" from past actions
- Search action items by task
- Search action items by date
- Search action items by lead user
- Requires Cold Fusion server 4.5 or higher
- Easy to fit into current web site's "look and feel"
- Uses Microsoft access database
 - Can be upgraded / imported to SQL Server, MYSQL or other server database applications.
